Characteristics of Bemo Cloud

01 Seamless integration for the entire business

Bemo Cloud supports integration for all departments, operations of the business with data, helping to optimize time and resources.

02 Reasonable cost, used according to realistic needs

No initial deployment costs. The monthly cost is reasonable according to the actual needs of the business with quick implementation time.

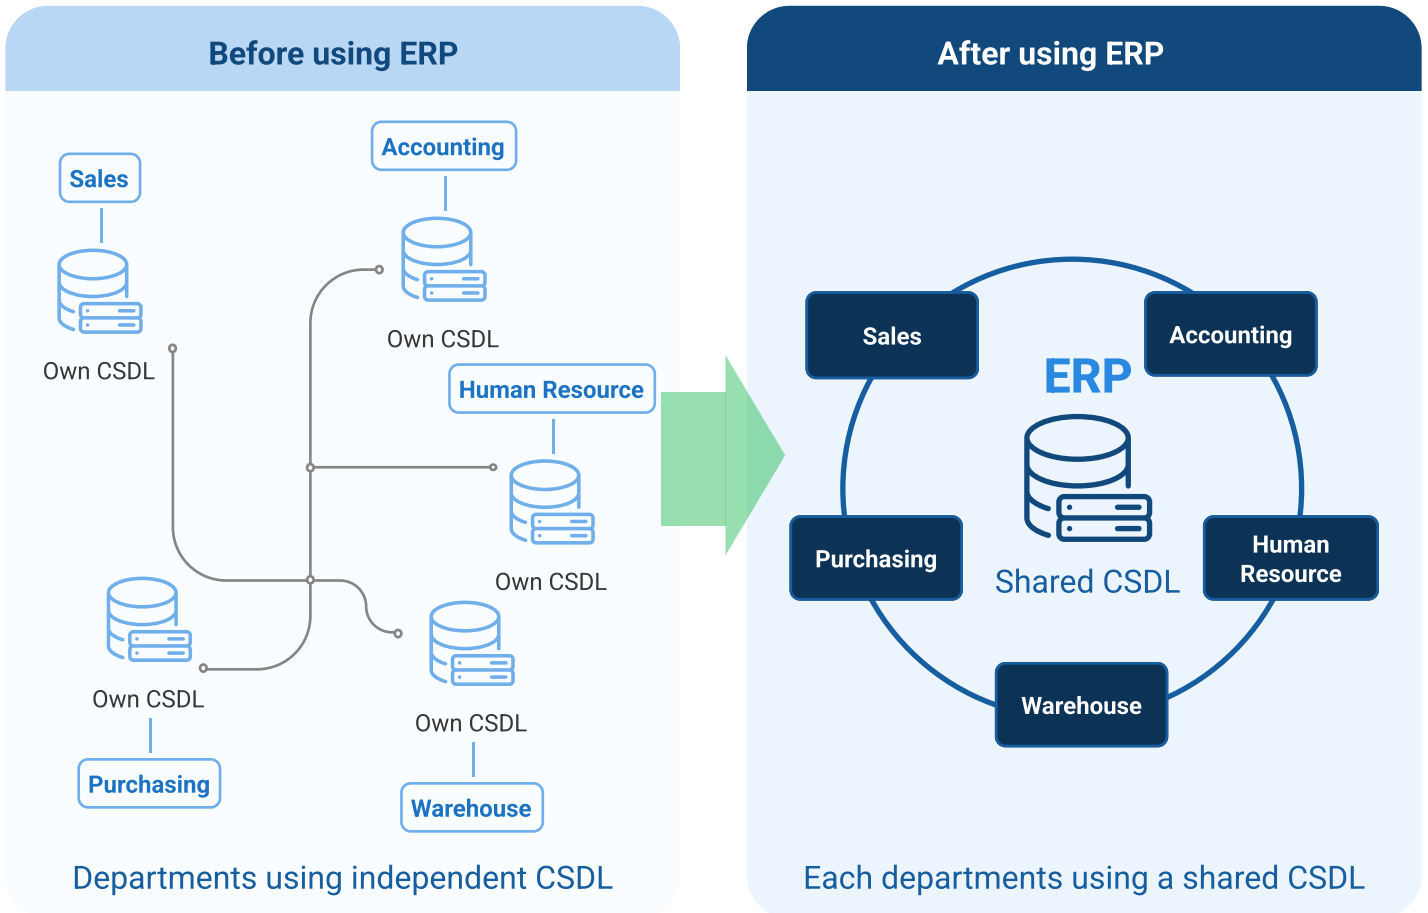

03 Applying modern technology

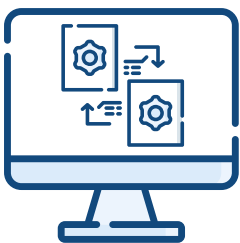

Bemo Cloud builds modern technologies such as AI, Blockchain... to bring breakthrough features to customers: time attendance by facial recognition, automating RPA process...

What is ERP?

ERP is a system that integrates core activities of the company such as accounting, human resources, sales... to improve business efficiency and unify information, helping all employees access and capture company information instantly.

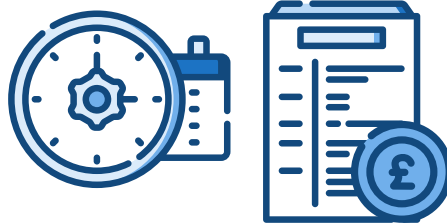

Along with the above advantages, the ERP system also has its own drawbacks

High maintenance and upgrade cost

ERP systems need to be monitored and maintained periodically as well as need time to update new features, causing costs and disruption to business operations.

Lots of time and cost to develop

ERP is a complex business system, it usually takes 6 -12 months to develop and put into use with the initial deployment cost to equip the server and necessary equipment.

Limited on linking with other services

Data security issues and inadequacies of old technology are reasons why businesses configures an internal ERP system, disconnecting them from the outside, leading to limited integration with other services.

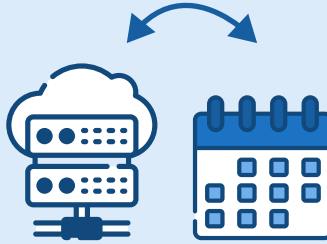

Bemo Cloud - Optimal Solution

Bemo Cloud = ERP + Cloud

Reasonable Pricing

Only from 10\$/person/month instead of millions of USD for other typical ERP systems.

No need to worry about maintenance and upgrade

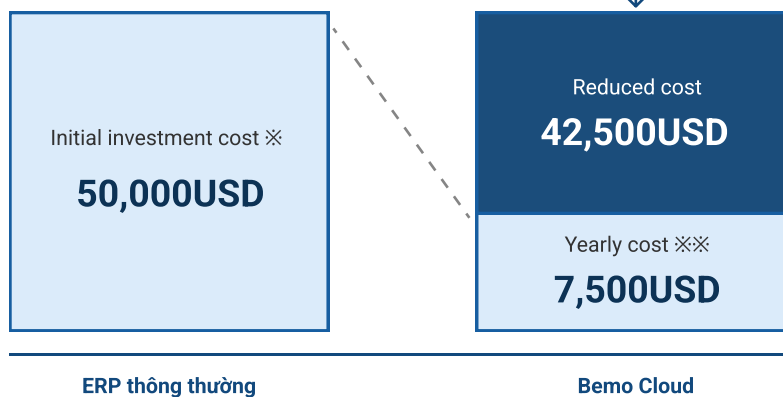

The Bemo Cloud team takes care of maintenance and upgrades according to business needs.

Integration with external services

Integrate with many external services flexibly and easily.

Cost saving

※ Statistical data from online sources for small and medium enterprises (SMEs)

※※ For businesses with 300 full-time employees

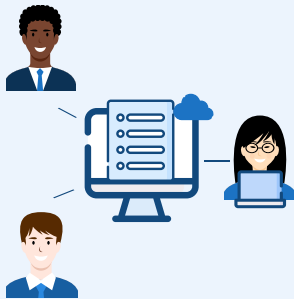

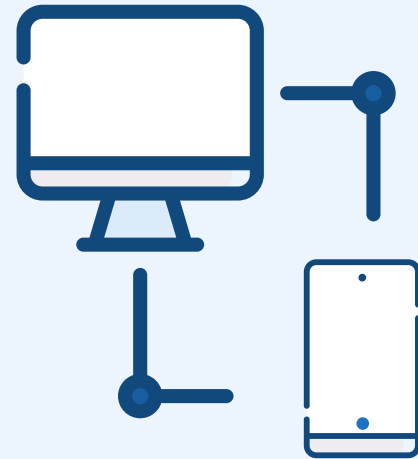

Comparison

| | Traditional Method | Using Cloud Services (SAAS) |
|------------------------------------|---|------------------------------------|
| Reasonable Price | × | ○ |
| Overall Business Management | △ | ○ |
| Standardized Procedure | △ | ○ |
| Initial Expenses | △ | ○ No initial deployment cost |
| Maintenance and Upgrade | × Requires a dedicated team | ○ |
| Flexible Shelf Life | × | ○ |
| Quick implementation time | × | ○ Within 2-4 weeks |
| Integration with external services | × Manually linking via CSV, Excel files | ○ Automated linking through an API |

Understanding the Cloud

Access anywhere via the internet

Cloud computing is a service that stores data on the Internet, allowing users to access and edit data from anywhere, anytime.

Instant data sharing

Data is quickly shared between/within departments, eliminating the use of paper and enabling centralized management of data sources.

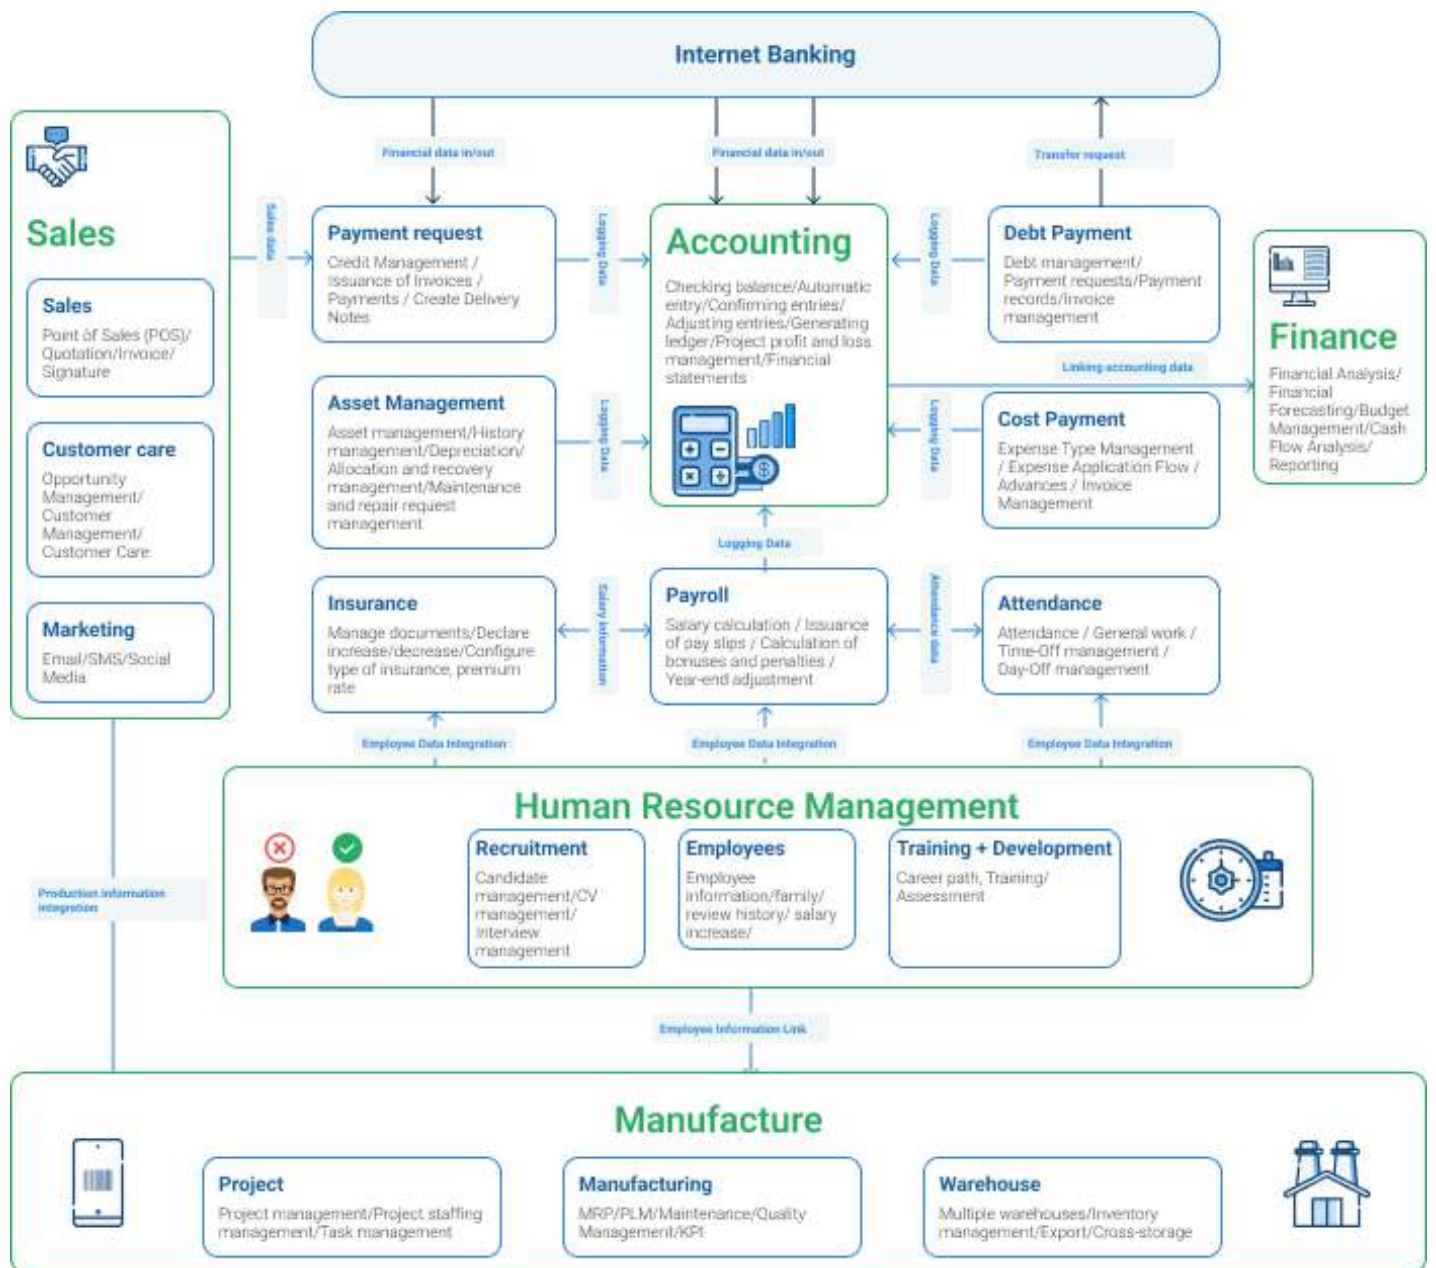

Data protection, cost optimization

Data is automatically backed up, avoiding the risk of data damage or loss.

Upgrades are continuously updated free of charge in accordance with the business needs.

There are no additional costs such as maintenance or re-installation costs.

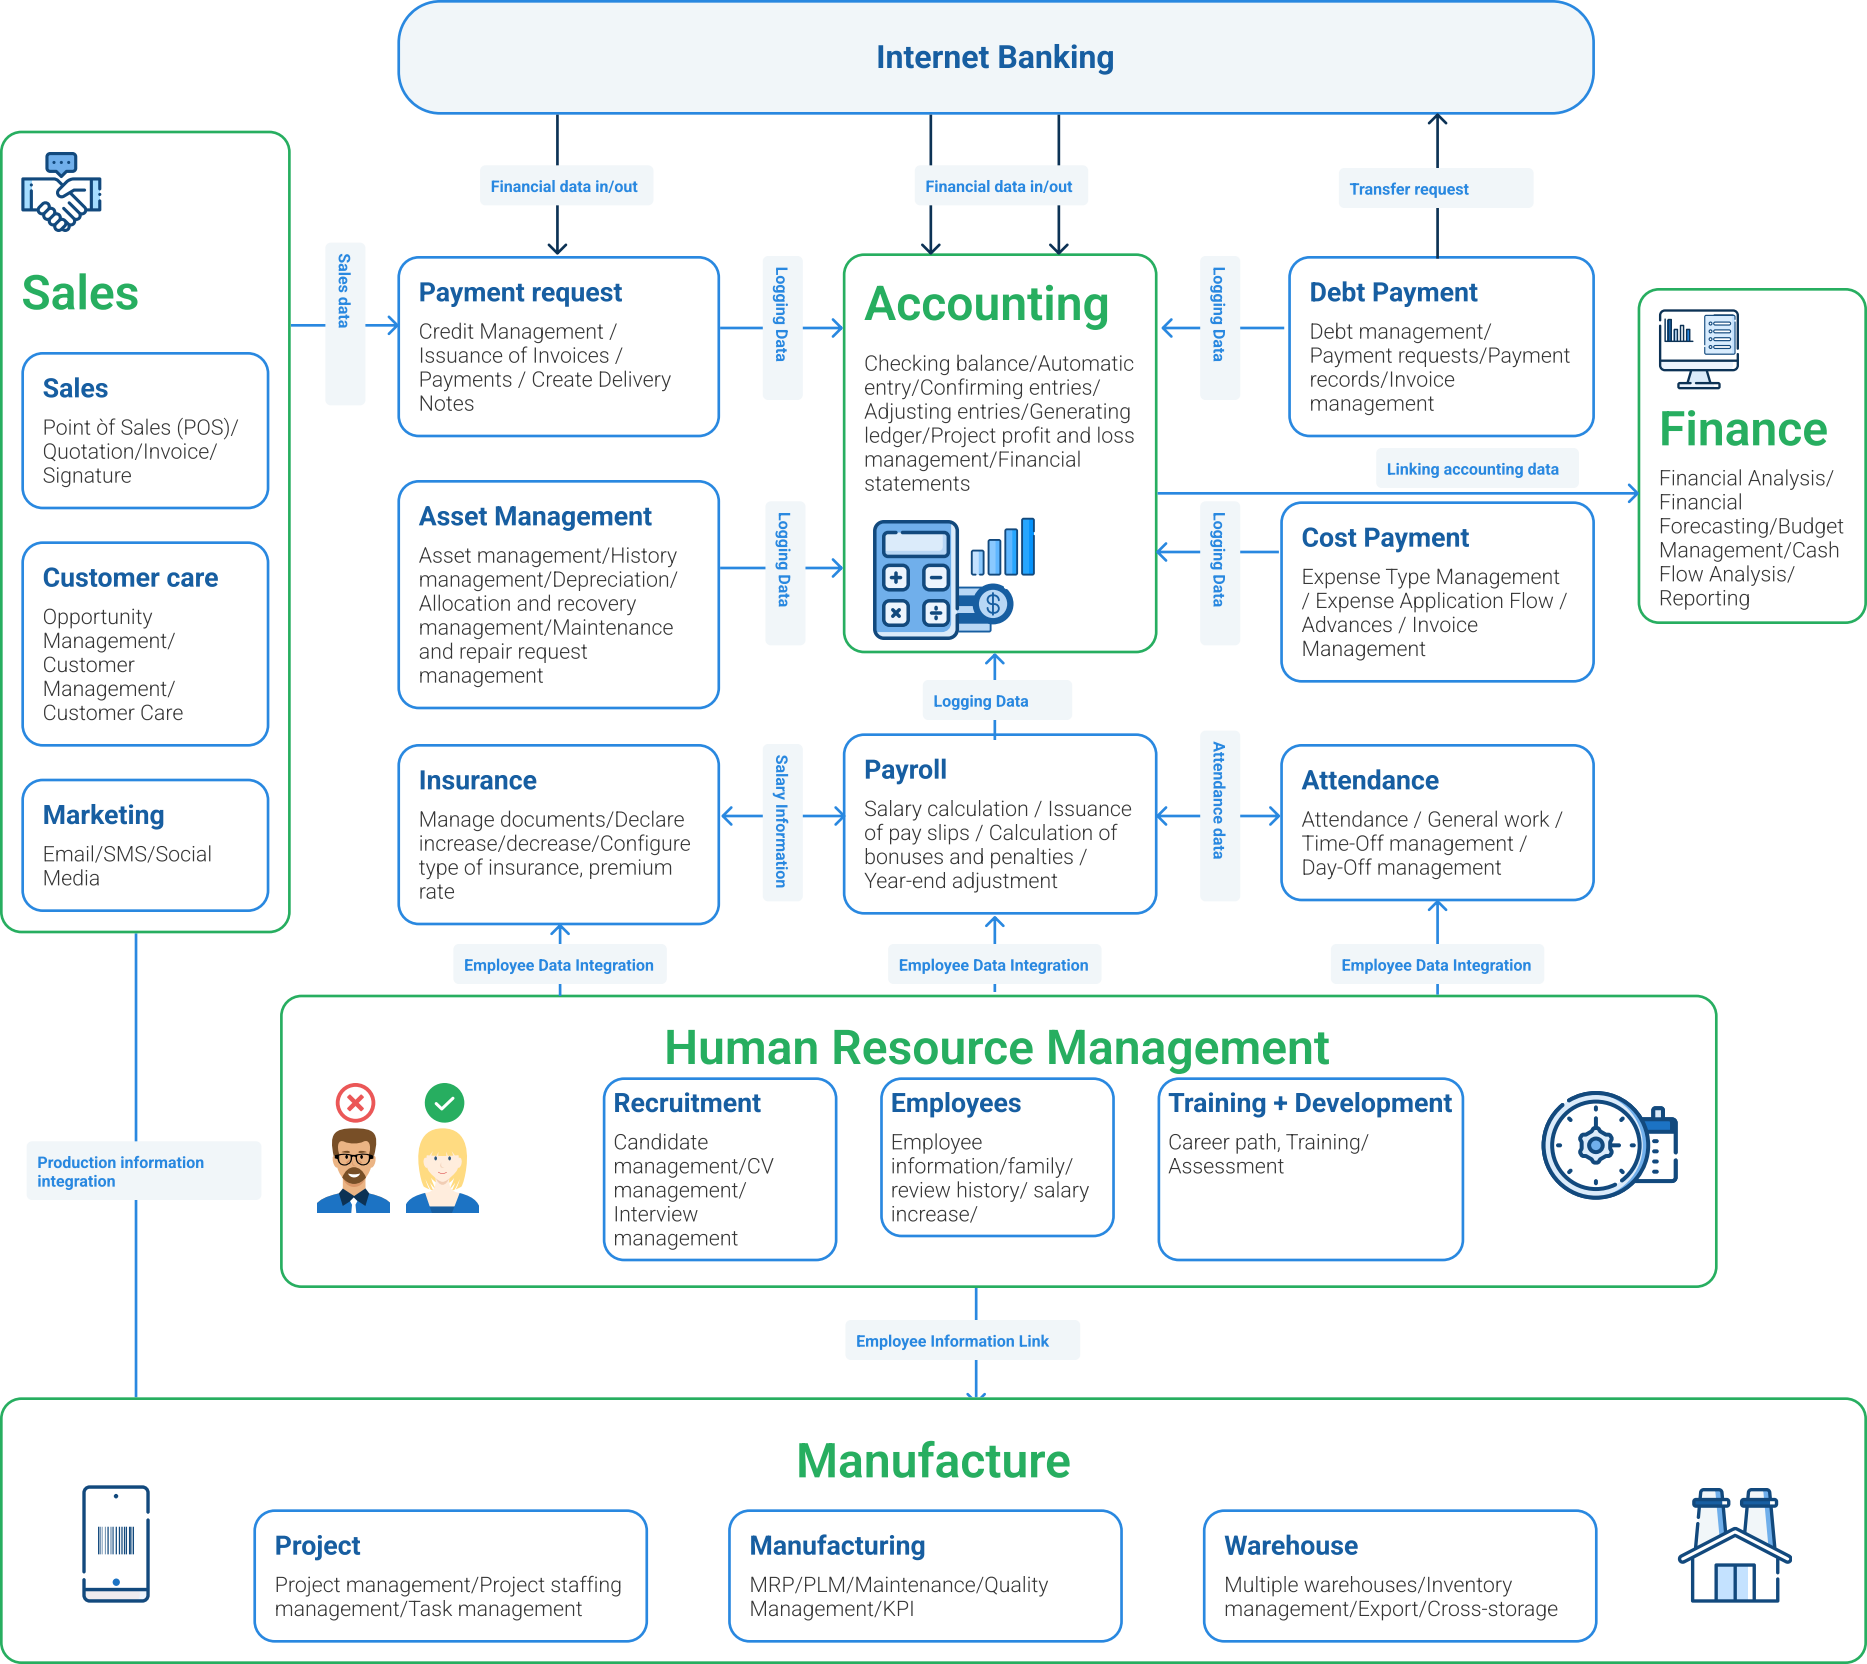

Map of Overview for Bemo Cloud

In the digital age, data is a valuable asset of businesses

Bemo Cloud helps to store, synchronize and aggregate data, making it easier for leaders to operate businesses and make data-driven decisions.

Dashboard

| | | | | | |
|------------------|--|-----------|------------|-----------|----|
| Họ và tên | Nguyễn Thị Thanh Tâm | Ngày sinh | 21/08/1991 | Giới tính | Nữ |
| Địa chỉ hiện tại | Số 123 Đường Nguyễn Huệ, Quận 1, TP. HCM | | | | |
| Số điện thoại | 0909 123 456 | | | | |
| Ngày nhập học | 15/03/2018 | | | | |
- Thông tin về quá trình làm việc (Work History):** A table lists employment records:

| Đơn vị công việc | Ngày bắt đầu | Ngày kết thúc | Chức vụ |
|------------------|--------------|---------------|-----------|
| BAP Ventures | 15/03/2018 | Hiện tại | Nhân viên |
- Thông tin chi tiết về nhân viên (Employee Details):** A sidebar on the right shows the company structure:
 - CÔNG TY:** Tất cả (50), BAP Software (25), BAP IT (15), BAP - ventures (30)
 - BỘ PHẬN:** Tất cả (50), Administration (10), Management (15), Professional Service... (10), Research & Develop... (10), Sales (10)
 - DỰ ÁN:** Tất cả (50), Banno (10), Delfi (10)
- Sơ đồ cấu trúc quản lý khoa học (Organizational Chart):** A tree view shows the reporting structure:
 - Nguyễn Văn A (Quản lý dự án)
 - Nguyễn Thị B (Nhà phát triển phần mềm)
 - Trần Thanh Ngọc C (Nhà thiết kế UI / UX)

Human Resource - Attendance

Supports many form of attendance

01 Features

Supports many types of contracts

Formal contract, probationary contract, part-time contract, service contract,...

Support many attendance methods

Time attendance by traditional cards, time attendance via mobile applications, time attendance using AI face recognition..

Automatically calculate and synthesize work

With the features that are set up before the calculation, the total work at the end of the month is done automatically.

Time Attendance using AI - catching up with the digital transformation era

1. Accurate timekeeping management

This technology automatically compares with pictures images on the system to log time attendance and avoid fraud

2. Data management on one platform

Automatic update of attendance, management, centralized storage on the software system..

02 Seamless data flow from time attendance to work summary

The link between timekeeping, application for leave... helps to automatically aggregate wages for businesses of any size without the need for additional personnel

Attendance

Aggregate Work

Payroll

Calculating Payroll

03 Cut costs, time and human error

Time card

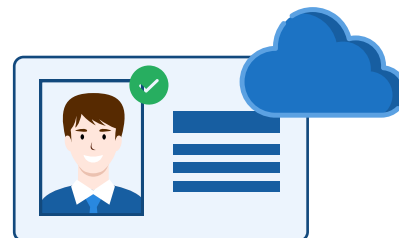

Statistic

Human Error

Human Resource - E-Contract

Electronic Labour Contract from BEMO

01 Features

Save time and money

Electronic contracts are flexible in signing. No storage fees, shipping and easy lookup.

Minimize Errors

No more omission of information or insufficient signatures on contracts

Data Synchronization

Data integration and synchronization create an information overview.

Information storage and security

Data is encrypted with blockchain technology.

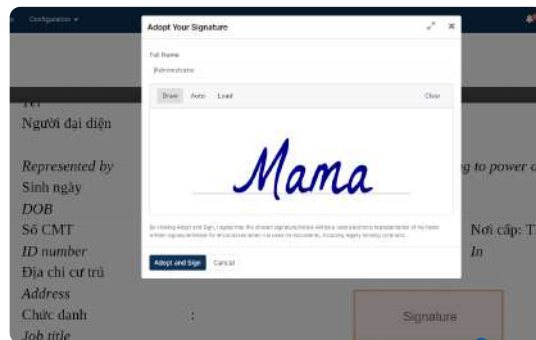

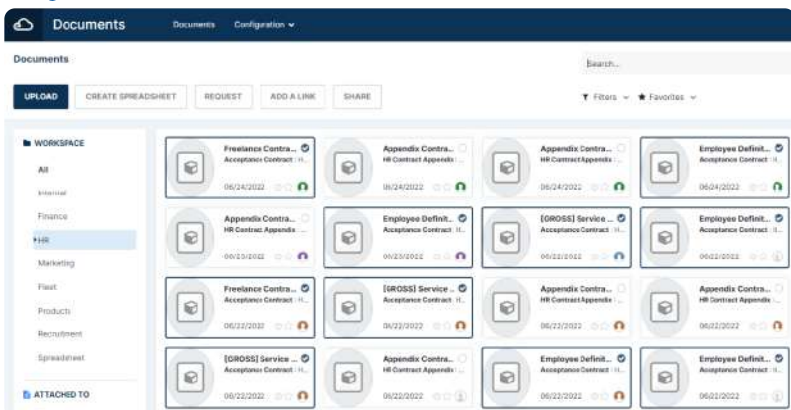

02 Hình ảnh

Fast electronic contract

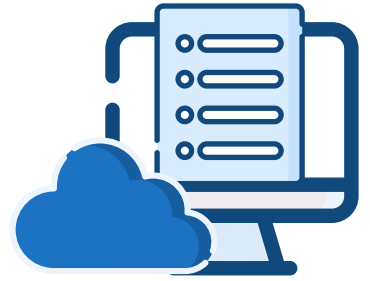

Data Synchronization

Electronic Signature

Human Resource - OCR

Character recognition by artificial intelligence

01 Features

Absolute accurate information

The content of the document is scanned by artificial intelligence to correct errors.

Save time and effort

Increase work efficiency, at the same time save human resources.

Speed up information processing

Dramatically improve the efficiency of employees and departments.

02 Image - Process

Documents

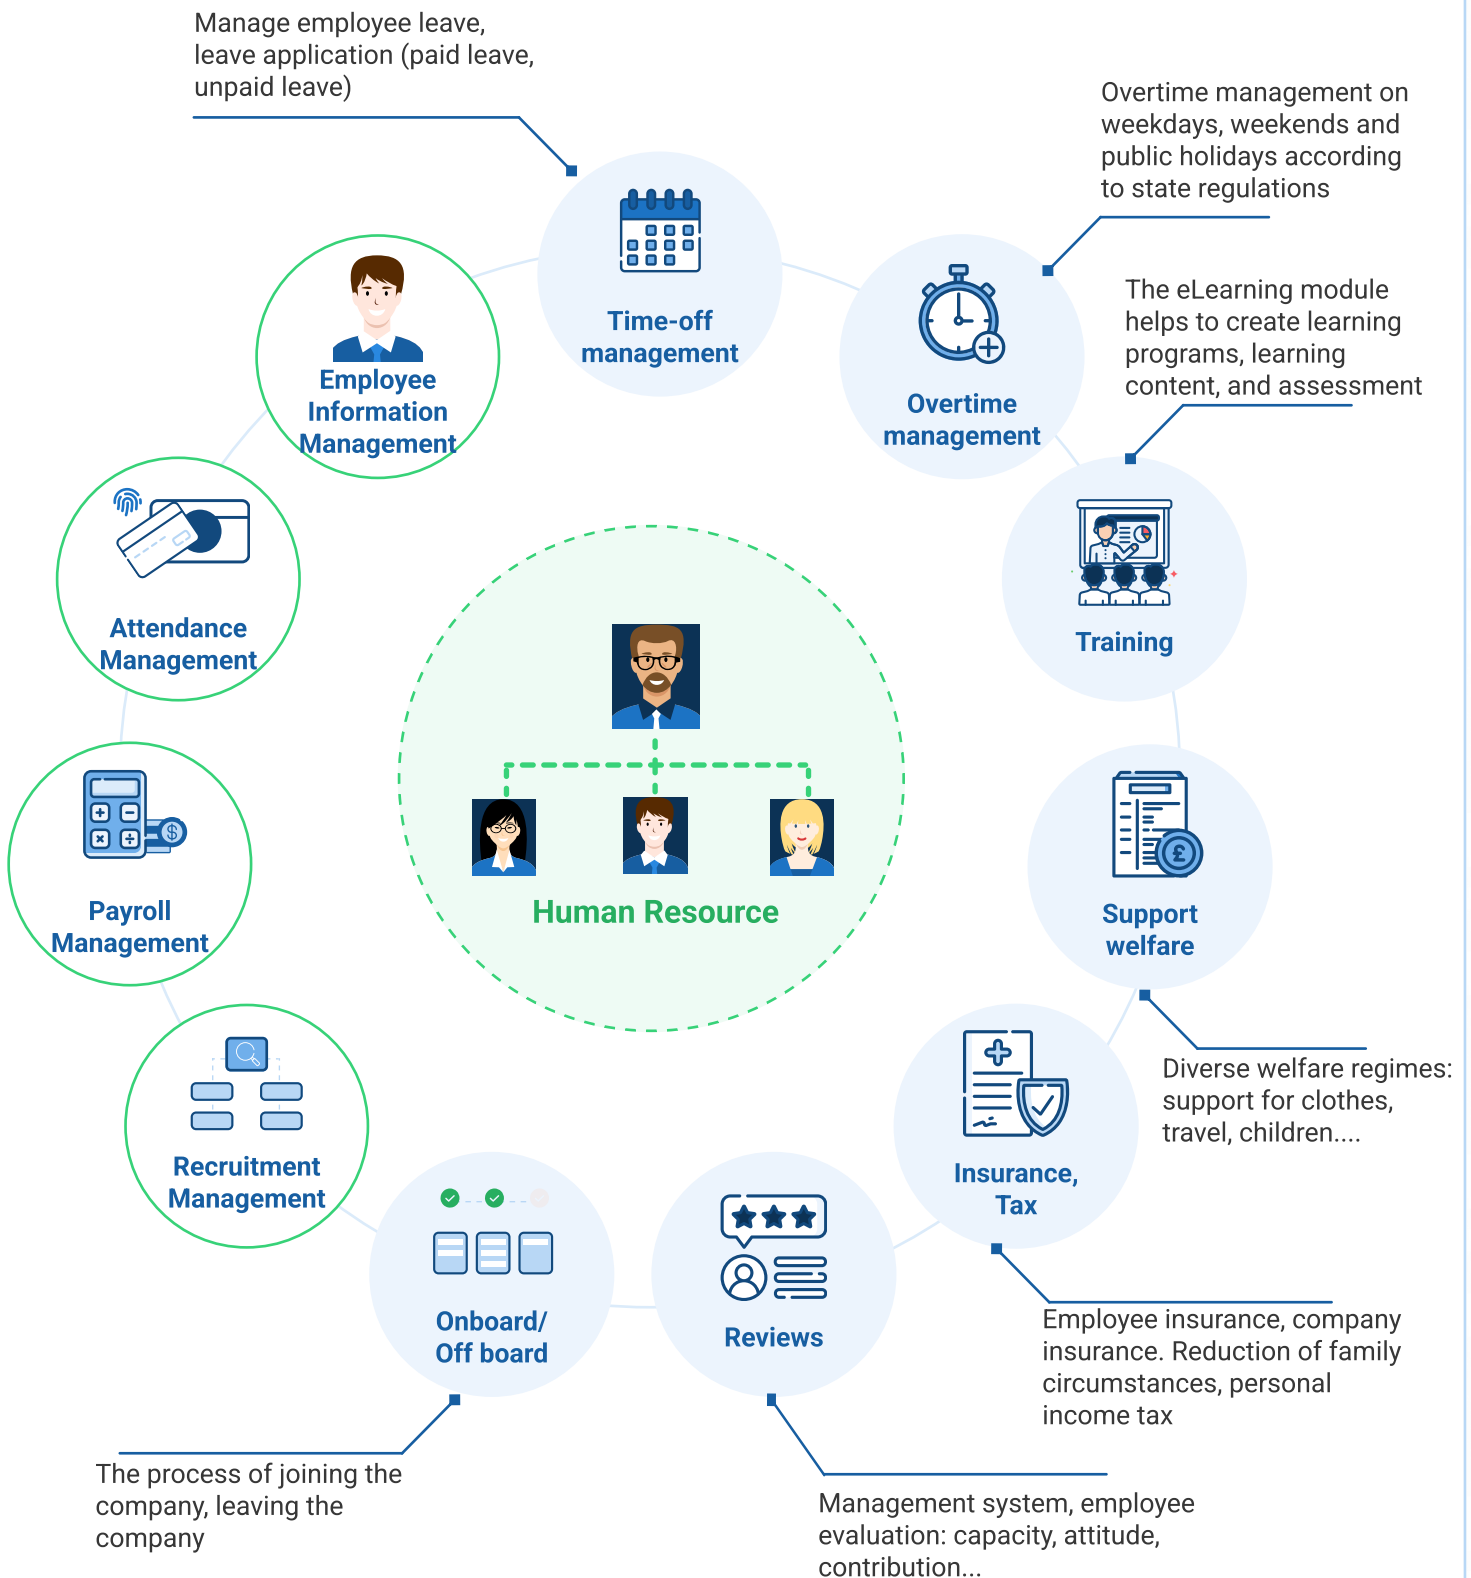

Data on device

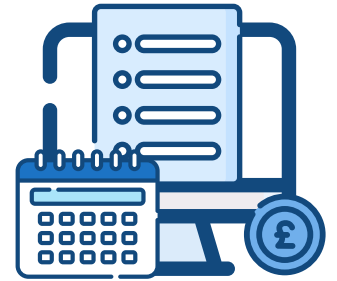

Other functions

Insurance, welfare, overtime management, ..

Payroll

Automate payroll, improve efficiency

01 Features

Automatic calculation

Get data from timekeeping, leave, benefits... to automatically calculate wages of any size without the need for additional personnel in charge.

Easily update changes

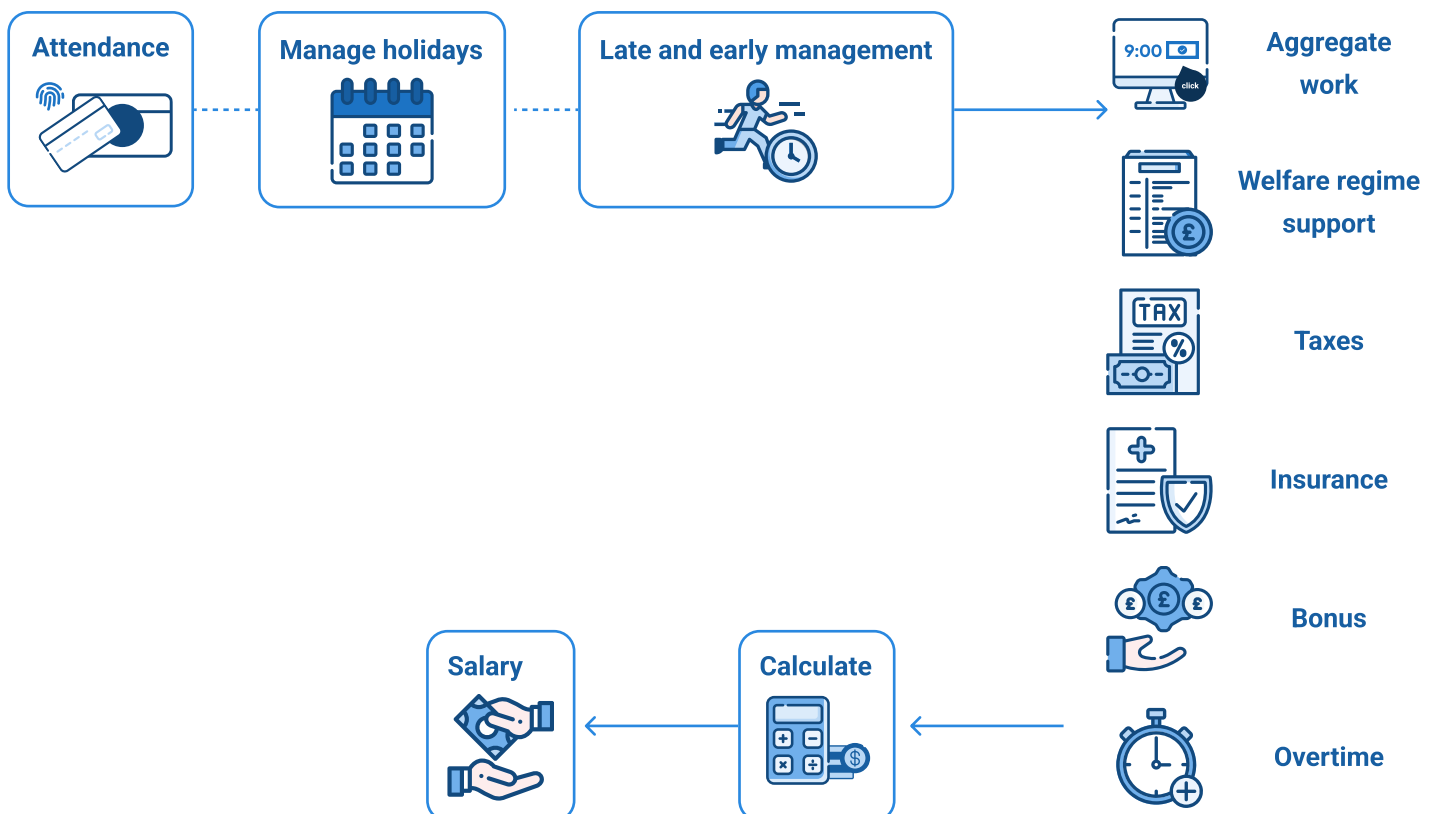

When there is any policy change from the State, business only need to make corresponding changes in the "Settings" section to apply.

Transparency

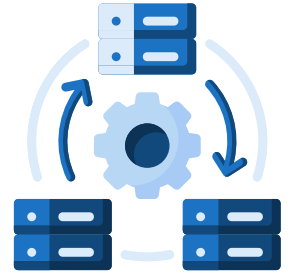

Employees can access the system themselves to check information such as salary, bonus, insurance costs, taxes and other benefits.

02 Seamless data flow, from Attendance to Payroll

Asset and Equipment Management

Optimizing cost and efficiency of use

01 Features - Strict management ensures the efficiency of assets

Synchronize information and data

Information about the assets of the enterprise will be aggregated in a uniform system, ensuring accuracy and reliability.

Manage and track asset status quickly

Asset status is updated instantly and completely, making it easy for departments to track, allocate, and plan efficiently.

Accurate, logical reporting

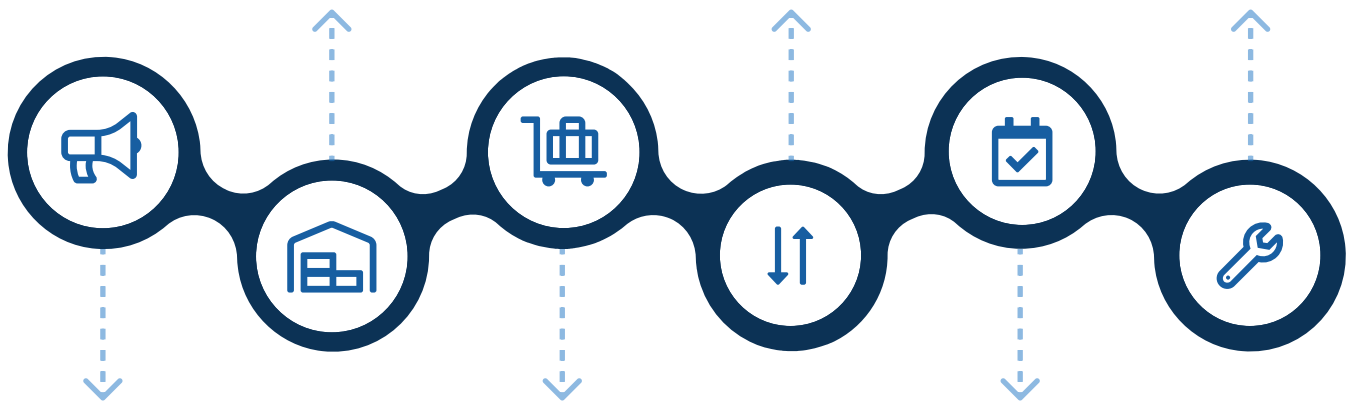

Diverse types of reports, dashboards on assets, costs, maintenance work, easy access, saving time.

02 Process - Strict management ensures the efficiency of assets

02 NEW PURCHASE/EXPORT
After the request is approved, a new purchase order or a request for delivery will be created

04 RECORD INCREASE/DECREASE
Record increase or decrease in assets

06 MANAGEMENT/MAINTENANCE
Management, maintenance, liquidation, recovery of assets

01 Request
Request for allocating assets

03 TRANSFER/ALLOCATION
Transfer or allocate assets as required

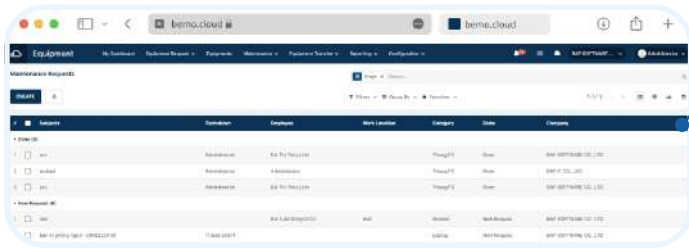

05 Depreciation/Allocation
Depreciation, inventory, liquidation of assets

Asset and equipment management

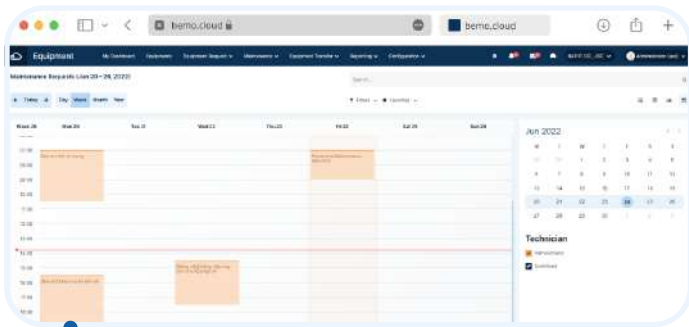

Provide an overview, close to the actual situation of the property

01 Monitor the status of assets and equipment

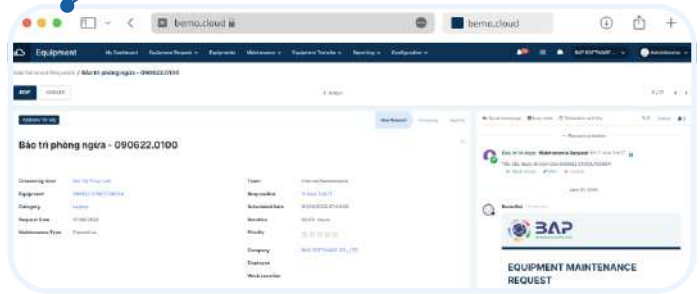

Monitor assignment, maintenance progress anytime, anywhere.

Automated maintenance scheduling, calculations, instant reminders according to the status of the asset.

Exchange information, distribute, attach documents... quickly and accurately.

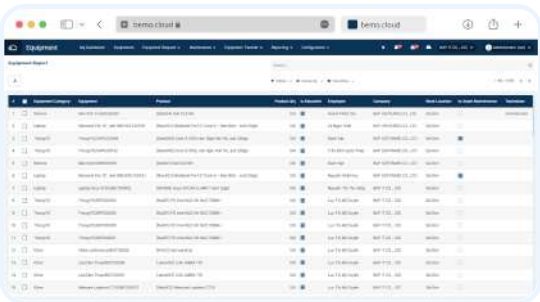

02 Diversed reports on demand

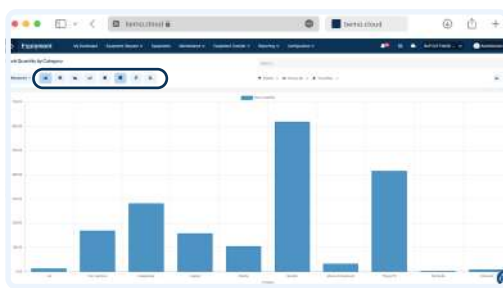

Dashboard, detailed, accurate and instant reports for each asset type.

Accounting for assets, allocating depreciation, maintenance...

Intuitive reports, hosted on Bemo, easy customization.
